

Thank you very much for the nice and first of all professional and constructive reception of representatives of our Group at the Embassy of the Islamic Republic of Iran. As agreed, we would like to once again present to the Mr. Ambassador which companies are part of our Group.

Our biggest company is Fabryka Przyczep Niewiadów. Its traditions go back almost 100 years, however, it has been in the current ownership system since 2013.

The profile of its activity has been preserved, however, we are constantly improving our products and expanding our markets. Information about Fabryka Przyczep and its full offer can be seen on the website: www.niewiadow.pl

We also have other companies from the automotive industry, e.g. TEVOR Sp. z o.o., which manufactures specialized vehicles, mainly roadside assistance and rescue vehicles, provides sales services for commercial vehicles, warranty and post-warranty service, and painting services at a quality level that meets the expectations and requirements of customers. Her website: www.tevor.pl

TENSA AUTOMOTIVE Sp. z o. o. is a European manufacturer of bodies for trucks. TENSA Automotive designs and manufactures excellent quality car bodies for various industries. The full offer and scope of services is available on the website: www.tensa.pl

Development companies are an important element of our group. Our completed investments, Żubr in Spała, Apartamenty Wiejska 16 in Tomaszów Mazowiecki or Wysoka 13 in Piotrków Trybunalski can be seen at: www.apartamenty-spala.pl. We have several started investments and several new planned for the coming years.

Our group also cooperates with the Dźwigi Krupiński company, which designs and manufactures tower cranes. www.krupinskicranes.com

The Group also includes several smaller companies.

Referring to our meeting, we would like our cooperation with the Islamic Republic of Iran to start with the purchase of steel and aluminum products. We are interested in the following assortment:

- Hot-rolled sheets S235JR EN 10025, coils 1500, sheet thickness 2.0mm; 2.5mm; 3.0mm; most of sheet formats 1500x3000;
- Hot-rolled sheets S355MC EN 10149, coils 1500, sheet thickness 3.5mm, most of sheet formats 1500x3000
- Hot-rolled sheets S420MC EN 10149, coils 1500, sheet thickness 4.0mm, most of sheet formats 1500x3000;
- Cold-rolled sheets DC01 EN10130, coils 1250 with a sheet thickness of 2.0mm; 2.5mm, most of sheet formats 1250x2500;

- Galvanized sheets DX51D Z275 A-C EN 10346:2009 EN 10143 coils 1000, sheet thickness 0.8mm; 1.0mm; 2.0mm; 2.5mm sheet formats of various lengths;
- Galvanized sheets DX51D Z275 A-C EN 10346:2009 EN 10143 coils 1250, sheet thickness 0.8mm; 1.0mm; 2.0mm; 2.5mm sheet formats of various lengths;
- Galvanized sheets S350GD Z275 M-A-C EN 10346:2009 EN 10143 coils 1250 sheet thickness 2.5; 3.0 sheet formats of various lengths;
- Galvanized sheets DX51D ZA255 A-C EN 10346:2009 EN 10143 coils 1000 sheet thickness 1.0mm sheet formats of various lengths;
- Aluminum sheet EN AW-5754 H22 coils 1250 sheet thickness 4.0mm sheet formats 625x2000 sheet formats 625x2500;
- Grooved sheet A1Z4/1050AH244, 2mm thick;
- Steel B500SP; B500A; AIIIIN, diameter from 6mm to 30mm.

In the next stage of our joint venture, we would like to promote our Group's products on the markets of the Islamic Republic in Iran.

Referring to the meeting and conversation with the Ambassador, we propose to provide you with contacts to the company producing fire trucks that you were interested in. We would also like to point out that we cooperate with a company producing concentrates and artificial fertilizers, which, upon hearing about our visit to the Embassy of the Islamic Republic in Iran, prepares a separate inquiry to the Ambassador in order to present its offer and cooperation opportunities.

We look forward to starting a quick and long-term cooperation.

Yours faithfully,

Adam Staruszkiewicz

Chairman of the Board
