To be held at
Sandton Convention Centre

This Summit will stimulate the investment needed to reach these goals and will provide the official public platform for policy announcements and private sector buy-in.

Why Africa?

Africa is stable and well developed, with a large economy and a wealth of mineral endowments that rival global and African minerals producers. It is well established as a global mining leader, with an attractive mining industry framework and huge downstream and industrial market.

South Africa is the **most attractive destination for critical minerals production** in Africa and the leader in Africa's energy transition.

South Africa will lead Africa's critical minerals production – and thereby contribute to a global just energy transition that benefits South Africans and people everywhere.

Goals

Position Africa as the leading critical minerals producer on the African continent and a leading producer in the world.

Position Africa's critical minerals investments and projects as key drivers for a Just Energy Transition.

Ensure that Africa's critical minerals sector is globally competitive and attracts global investment while benefitting communities and expanding the nation's economic potential.

DMRE to publicize the policies and actions that will be implemented, explain them and create partnerships with private sector to ensure their effectiveness.

Target Sectors & Segments

Mining

Mining Services

Renewable Energy

Energy Storage

Technology & Computing

Aerospace

Defence

EV & Transportation

Finance

WHAT ARE

CRITICAL MINERALS?

Among others, they include copper, lithium, nickel, cobalt, platinum and rare earth elements.
